DETAILED ACTION

Drawings

1. The drawings are objected to because Figure 3, fail, to show descriptive language along with the reference numbers to identify each element of the drawing as described in the specification. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

The drawing is objected to as failing to comply with 37 CFR 1.84(p)(5) because it does not include the following reference sign(s) mentioned in the description: Reference number 24₂, is not shown as one of the outputs of converter 24. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities:
Is "input sample" recited on page 6, line 25, the same as "input signal" recited (page 6, line 24)? If so, line 25 should be amended to refer to recitation "input signal".
Appropriate correction is required.

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a **single paragraph** on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

5. Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is narrative in form and do not contain positively recited steps of a specific process. Note that the method claims should set forth a series of steps in the active tense in an instruction-like manner thereby reciting an actual method. Dependent claims should further limit base claims by reciting additional method steps in a likewise fashion. Ex parte Erlich 3 USPQ2d 1011 at 1017[6]

Claim Objections

6. Claims 1-12 are objected to because of the following informalities:

Claim 1, line 2 recites, "A method wherein", however, there is a previous reference to

"A method" in line 1. Examiner suggests that lines 1-2, be amended as follows: "A method for linearization of a wide frequency band power amplifier comprising the steps of: ...".

Claim 3, line 15, is "predistortion values" same as predistortions recited in claim 1, line

7? If so, claim 3, should be amended to refer back to recitation in claim 1.

Claim 4, line 2, is "this input signal" the same as "the sampled input signal".

? If so, the claim should be amended in such a way to replace "this input signal" by said/the sampled input signal.

Claim 9, line 35-36, can be amended to recite, "The method as claimed in claim 1

wherein said method, is used to linearize the power amplifier of a transmitter".

Claim 12, line 7, can be amended to read "The method as claimed in claim 8 wherein said method, is applied to a station comprising..."

Claims 2, 5, 6-11 are likewise objected to because of their dependency to an objected base claim.

Appropriate correction is required.

7. Claims 1-12 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.
